Why Reflection POS

Reflection POS® is proven software with more than 30,000 systems installed in 35 countries around the world.

Reflection POS® is equipped with the most sophisticated network on the market. System information is automatically replicated on every terminal across the high-speed TCP/IP network. The self-healing network automatically corrects for interruptions and resumes data synchronization without management intervention.

Built on solid-state technology and an embedded operating system, Reflection POS® is not susceptible to viruses or spyware so you can rest assured that it will be ready to perform when you need it.

Why take a chance with anything else!
