POS Software That Suits Your Store

acceo

Every detail matters to us

At ACCEO, our superior-quality retailer software, such as ACCEO Logivision, help us create solid relationships with our clients.

We understand that secure transaction registration and efficient data analysis are of paramount importance to retailers. This is precisely what ACCEO Logivision is all about: a user-friendly point-of-sale (POS) system designed to meet your specific needs.

Improve your checkout operations

The ideal POS should help you reduce manual entries and mundane tasks to provide you with more time for what really counts. Choosing the right POS will perhaps be one of your best business decisions.

Checkout features

- PCI-compliant integrated and semi-integrated payment options
- EMV-ready
- Cashier monitoring
- Interfacing with Digital Video Recording software
- Hardware and peripheral management
- Security levels to control access
- Electronic journal for audit trail
- On-screen advertising
- Line-busting
- Personalized screen layouts
- Hot-key items, quick menus, and item scanning
- Training mode
- Mobile checkout counter
- Gift cards
- Gas pump interface

ACCEO Logivision POS system

The ACCEO Logivision point-of-sale system is easy to use, easy to manage, and designed specifically for fast retail: supermarkets, c-stores, liquor stores, and specialty retail stores. All the tools you need

to design entry screens,

manage peripherals,

and interface with

the back-end

application

are included.

● Service above all else

Are your employees offering high-quality service to your clients? Help them spend more time on customer interaction and less time processing transactions.

● Geared to your needs

ACCEO Logivision is customizable, which helps eliminate repetitive tasks to simplify your operations. Your employees can then figure out the basics easily without any help. Your current POS might not be configured to minimize the number of steps in the sale process and reduce transaction time; ACCEO Logivision is.

● A superior customer experience

You will make a better impression on your customers by speeding up their checkout. No retailer likes to see an abandoned cart or lose a customer. ACCEO Logivision allows cashiers to ring up items and complete the payment process faster. It also accepts quick forms of payment (such as debit and credit) to reduce time spent handling cash. The software, combined with display ads that promote your products, will delight your customers.

● Protect your customers' data

The retail industry has experienced an alarming number of data and security breaches that have resulted in the loss of millions of customers' credit-card and personal information. Your current POS might not meet the regulatory and policy requirements for credit-card acceptance; ACCEO Logivision does.

● Reduce the risk of errors

ACCEO Logivision allows you to have tight control over your cash operations, use the software securely, and restrict operations based on user-level permissions. It also interfaces to the proper hardware for scanning or weighing products, prints the right items on cash receipts, and stores your information in a secure audit trail.

Manage your retail operations efficiently

Running a business is complex: as a retailer, your work days are a constant race against the clock. Trying to do everything manually or on your own will not necessarily yield the success you anticipated.

Using a back-office system like ACCEO Logivision becomes a necessity. You need to store all your product, employee, and customer information securely. POS software needs to compile your data on the fly. It's important to have access to up-to-the-minute sales data at all times. ACCEO Logivision will help you analyze what's happening in your store at any time during the day in order to optimize the management of your business.

Back-end features

- Product maintenance and price modelling
- Promotional batches
- Real-time exchange keeps things up to date
- Integrated report builder
- Automatic backups
- Transaction search and review
- Employee time clock
- Basic rental tracking
- Cashier and safe balancing
- Data transfer to accounting packages
- Automatic update system

Manage your inventory

Customers enter your store in the hopes of finding what they're looking for. ACCEO Logivision helps you manage your inventory, keep track of orders, and ensure that your suppliers are delivering the right products at the agreed price.

Inventory control is crucial to your income. Knowing your quantities on hand will help you monitor your losses. ACCEO Logivision informs you about inventory changes so you can detect theft, and damaged goods or spoilage.

Inventory control features

- Stock control and average cost valuation
- Ordering, receiving, and store counts
- Inter-store transfers for multi-outlet retailers
- Handheld device for inventory control and price verification
- Printing of price labels and shelf tags

Build customer loyalty

Your customers are the most important people in your business, and that's why customer management is so crucial. One of the biggest challenges that retailers face is how to attract new customers, not to mention the challenge of convincing customers to come back. Because information is so easily available to anyone, consumers have developed very high expectations. Consumers' profiles and behaviour are also constantly evolving.

ACCEO Logivision acts as a hub of valuable client information, letting you know your customers better so that you can create the right offers for them.

Customer loyalty features

- Track account balance, charges, and statements
- Manage privileges with discounts and price levels
- Track item purchases per customer
- Implement product reward programs
- Use an earn-and-burn point system

Centralize management at headquarters

Your business is blooming and you're worried your workload will expand exponentially. Growing your business should be an exciting challenge. When choosing your POS, make sure that the system is able to support multiple outlets in order to keep pace with business growth.

ACCEO Logivision manages remote store data communication, which means you can centralize your management activities at headquarters. Eventually, this one single store could become part of a chain.

Centralization features

- Perform data exchange with headquarters
- Retrieve sales information from stores and channel it to the central system
- Push product, customer, and employee data from central to target stores
- Transfer products between stores

Growth should be
an exciting challenge!
